SUMMARY

Frontend developer with 8+ years of experience building production web applications in healthcare AI and financial services, plus years teaching and mentoring developers. Specializes in React, TypeScript, state management (Zustand, Redux) and accessible UI (WCAG). Co-developed the frontend of Wisedocs' next-generation platform in React and TypeScript, delivering a 300% productivity increase over the legacy system. Looking to own complex frontend features, lead migrations and help raise the bar for code quality and accessibility on a senior team.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, Sass, Python

Frameworks & Libraries: React, Vue.js, Redux, Zustand, Vuex, React Router, Tailwind CSS, shadcn/ui, Bootstrap, jQuery, AngularJS, Node.js, Django

Testing: Jest, Cypress

Tools & Platforms: AWS, Git, Docker, Figma, Firebase

Practices: Web Accessibility (WCAG), Performance Optimization, Legacy Platform Migration, Agile/Scrum, Test-Driven Development, AI-Assisted and Agentic Development

WORK EXPERIENCE

Frontend Developer, Wisedocs | Dec 2023 – Oct 2026 | Toronto, ON

AI medical documentation

- Co-developed the frontend of Wisedocs' next-generation internal and client-facing platforms using React, TypeScript, Zustand, shadcn/ui and Tailwind CSS, delivering a 300% productivity increase over the legacy platform through rendering optimizations and redesigned user flows
- Owned full features end to end, from product requirements and Figma designs through deployment to test, staging and production environments on AWS
- Maintained and extended the legacy Vue.js, Vuex and Bootstrap platform, keeping it stable for internal and external users throughout the migration
- Partnered with stakeholders to define and validate product requirements and translate them into technical implementation plans
- Triaged reported issues and shipped bug fixes, performance improvements and usability enhancements across both platforms
- Scoped and planned upcoming engineering initiatives alongside engineering leads
- Integrated agentic AI workflows into development, testing and automation to accelerate delivery

Web Development Instructor, Juno College of Technology | Feb 2021 – Apr 2023 | Toronto, ON

- Promoted to Intermediate Web Development Instructor (Mar 2023)
- Taught full-time and part-time bootcamp cohorts of 20–40 students covering HTML, CSS, JavaScript, React, React Router, Git, Firebase and WCAG accessibility
- Mentored 200+ students through 1:1 and group sessions on debugging, code quality, portfolio reviews and interview preparation
- Reviewed student code with feedback focused on performance, modern best practices and accessibility
- Designed and updated curricula for full-time, part-time and accelerated programs to keep content aligned with current industry practices
- Resolved technical issues in core Juno repositories and the main website as part of an internal task force, contributing to codebase migration and the rollout of new services

Frontend Developer, BMO Financial Group | Jul 2020 – Feb 2021 | Toronto, ON

- Built and optimized features for BMO's public website, redesigning product pages for bank accounts, credit cards and marketing campaigns
- Developed with React, Redux, HTML5 and CSS3, and wrote automated Cypress tests for new pages and features
- Ensured all deliverables met WCAG accessibility standards and banking regulatory requirements

- Collaborated with design, marketing and product teams through sprint planning, design reviews and retrospectives to deliver on schedule

Frontend Developer, PostBeyond | Jul 2019 – Dec 2019 | Toronto, ON

- Led the migration of the admin portal from AngularJS to React, using Redux for state management, Sass for styling and Jest for testing
- Prototyped next-generation versions of the platform and evaluated React and Redux as a replacement for the existing frontend stack
- Assessed platform limitations and ran feasibility tests on proposed features, providing technical recommendations to the team
- Developed and optimized product features using AngularJS, JavaScript, CoffeeScript, Less and Gulp, with Docker for local development

Assistant Instructor, University of Toronto | Mar 2018 – Jul 2019 | Toronto, ON

- Supported instruction in HTML5, CSS3, JavaScript, jQuery, Node.js, React, Redux, Firebase and Java
- Taught production practices including WCAG compliance, CRUD operations, Agile development and SEO through real-world code examples

Freelance Web Developer, Self-Employed | May 2017 – Jun 2019 | Greater Toronto Area, ON

- Designed and built websites and web applications for clients from concept to launch, collaborating on content, design and components
- Applied test-driven development, Agile workflows, WCAG accessibility and DRY principles to deliver maintainable code
- Built with React, Redux, Node.js, Ruby on Rails, JavaScript, jQuery, Bootstrap, MySQL and NoSQL databases

EDUCATION

Web Development Immersive, Bitmaker (General Assembly) – 2017

Bachelor of Commerce, Human Resource Management and Industrial Relations, Saint Mary's University – 2014
